

Does My Project Need a Construction Stormwater Permit?

Please complete the worksheet below after receiving your Land Use Permit from Benton County for construction in Watab Township. Return it to the township at the address on the bottom of this page prior to disturbing the land at your site.

Applicant Name: _____

Applicant Phone: _____ Email: _____

Project Address: _____

Project Description: _____

Will your project disturb land of greater than or equal to one acre (this includes all project land disturbing activities such as grading, landscaping, etc.)?

OR, is your project over 10,000 square feet in the Impaired Waters MPCA map or a new single family residential home in Oak Hill, Lake Andrew, or Pirates Cove Developments?

_____ Yes If yes, you are required to obtain a land disturbance permit from Watab Township.

_____ No If no, you are not required to obtain a land disturbance permit from Watab Township. However, you are still subject to the conditions of the Township **Ordinance #5: An Ordinance Establishing Erosion Control and Storm Water Management Requirements for Land Disturbances and Water Quality.**

To the best of my knowledge, the above information is correct, and I understand that I must follow the requirements of Watab Township’s procedures for all land disturbing activities. If I answered yes to the question above, I understand that I must obtain a Land Disturbance Permit from Watab Township before any land disturbance begins on my project.
